**FREIGHT SHIPPING**

Help Your Customers Understand Their Shipping Emissions

1. Easy Integration Into Your Solution

- Versatile data inputs (zip code, region, supplier name, etc.)
- Emission factor auto-selection

Your Software | Energy Data → API → **CO2e estimates**

2. Comprehensive Estimates

- Built-in support for renewable energy certificates and supplier-specific emission factors

Scope 1
Fuel combustion

Scope 2
Market- & location-based electricity, Heat & Steam

Scope 3
Fuel & Energy related activities (FERA)

3. Power Critical Business Tasks

- Data customers can trust for confident decision making

Carbon tracking

External reporting

Scenario modeling

Climatiq is the API powering over 100M+ monthly carbon calculations
